

The WaterShed 25 BY CALLAHEAD

The WATERSHED 25 is CALLAHEAD's 300-gallon freshwater tank protected in its own architecturally designed shed and built using only marine grade materials. The WATERSHED 25 is a CALLAHEAD exclusive created and invented by President and CEO, Charles W. Howard. The storage shed is very well insulated and equipped with a heater to avoid any chance of water freezing during New York's coldest winter months. The water tank is hooked up to a well pump to provide 50 pounds of water pressure to even the most remote locations.

The WATERSHED 25 is a perfect rental for any situation requiring non-potable fresh water and has no domestic water hookup available. Water refills are also available with every rental daily, weekly, monthly or tailored to your locations specific needs. Construction sites, restroom trailers, masonry work and irrigation jobs will all benefit from the WATERSHED 25.

The WATERSHED 25 looks spectacular and adds value to any location. It is constructed of only premium heavy-duty materials and built weathered tight. The high-density polyethylene marine grade construction has diamond plate marine grade aluminum panels, and stainless steel fasteners to create a gorgeous design. Five different metals on the exterior shine like a piece of jewelry. The WATERSHED 25 is also available in several color choices which include white, grey, blue, green and orange. All four sides include CALLAHEAD brand signage representing the best in the industry. For security, the commercial grade aluminum door has a key lock entry.

EMAIL: info@callahead.com

The WATERSHED 25 is commonly rented for water-shut offs, emergency locations, water freeze-ups, landscaping, to fill spas and pools, power washing jobs, and clean-up for any special event or job-site. CALLAHEAD also recommends the WATERSHED 25 to accommodate any of our Restroom Trailers, Headrest, Waterloo, Waterfall Shower Head, Sink Basin and any CALLAHEAD portable restroom or sink in need an additional water hook-up. The internal heating system inside the WATERSHED 25 is thermostat controlled to allow use all year round. The hoses are all heat traced to prevent freezing. Inside there is a four-way 110-volt outlet and a pull chain light fixture for convenience. The high gloss painted walls of the interior match the marine grade plastic colored exterior.

An impressive 50 pounds of water pressure is provided with the WATERSHED 25. A built-in well pump equipped with an expansion tank will deliver excellent water pressure to any secluded area. The WATERSHED's revolutionary design is like having a domestic sewer system in a location with no running water available. Conveniently, you can also rent an external hose cock, water hose, hose nozzle and external hose reel with any WATERSHED 25 rental all through CALLAHEAD.

CALLAHEAD is the leader in the portable sanitation industry since 1976. Like all of Charles W. Howard inventions, the WATERSHED 25 solves a common problem, which is delivering fresh water too hard to reach areas and protecting it from contamination and freezing. The WATERSHED 25 does not only provide fresh water to remote areas, but it also does so artistically and problem-free.
