

CAH A16 SINK

When you are looking for state-of-the-art portable sanitation equipment combined with service you can trust, CALLAHEAD is the only company that delivers. The CAH A16 SINK is another addition to CALLAHEAD's endless list of innovations. The CAH A16 SINK is an architecturally designed self-contained commercial sink enclosed inside its own room with thermostat heat to provide non-potable hot and cold running water in a warm and comfortable setting. Especially during New York's winter months. The CAH A16 SINK is perfect for handwashing, cleaning tools, paint brushes, dishes, cookware, and utensils or just about anything you can think of that can be washed in a sink. Our CAH A16 SINK is popular rental for construction sites, nurseries, special events, emergency locations, sporting events, and outdoor markets just to name a few. This amazing portable sink was designed by President and CEO Charles W. Howard for CALLAHEAD.

The U.S. Center for Disease Control and Prevention has concluded, "Keeping hands clean is one of the most important ways to prevent the spread of infection and illness." Studies prove that proper regular handwashing can save lives, making it a necessity to have washing facilities available in every public setting.

The CAH A16 SINK is the perfect solution for any location without a domestic water supply or requires additional sink options for health, safety, and cleaning for sanitary protection. The CAH A16 SINK is a self contain system so it does not require a water hook-up to operate. Sports fields, kitchen or bathroom remodeling jobs, water shut-offs or freeze-ups, Christmas tree lots, pumpkin patches, auto mechanic shops, petting zoos, industrial jobs, festivals, parks, food trucks, and the list goes on and on where the CAH A16 SINK is the perfect solution to provide fresh non-potable water. The CAH A16 SINK's architectural and durable design along with its function will add value to any location.

Once you open the self-closing commercial grade aluminum door and see the CAH A16 SINK's interior, you are immediately impressed. The door has a key lock entry as well as an internal locking system. The lockable door also protects from vandalism and deter access after business hours. The stainless steel vanity commercial single sink basin has a twelve inch chrome plated brass faucet and hot and cold water levers. A 2.5 gallon Bosch hot water heater will deliver hot water that can be adjusted to the perfect temperature utilizing the hot and cold levers. An on-demand fresh water pump supplies a good water flow. There is a stainless steel soap dispenser mounted directly by the sink basin. A stainless steel paper towel holder is wall mounted just above the sink. A porcelain pull chain light fixture is available for plenty of light inside. There is also a double outlet below the sink. The floors are an Armstrong faux wood plank design to add to the design.

The CAH A16 SINK is built weathered tight to handle every New York season. The heavy duty exterior design means the CAH A16 SINK can handle any commercial construction site. The CAH A16 SINK is offered in many color choices including white, blue, red, gray, brown, yellow, green, dolphin gray, steel blue and orange. With so many color choices, the CAH A16 SINK will blend in and look spectacular in every setting. Built and manufactured with only premium heavy duty marine grade materials, this is the greatest portable sink ever designed. A 1500 watt fan forced Dayton wall heater ensures warmth and comfort inside during New York's coldest winter months. The CAH A16 SINK is double walled and well insulated.

The CAH A16 SINK is constructed of high-density polyethylene marine grade plastic. It is manufactured by CALLAHEAD using only premium heavy-duty materials. The marine grade diamond plate aluminum and built-in marine grade stainless steel fasteners provide strength and design. The eye-catching design of five various metals together with its operation make it the greatest portable sink system every designed.

This is one of the most durable commercial grade stainless steel sinks available in the field with a roomy interior for warmth and comfort especially during the freezing winter months. The stainless steel design is not only durable but very easily cleaned and disinfected. Essential for construction jobs using cement, solvents and other hazardous agents the CAH A16 SINK is a must for worker safety. Event organizers and food vendors will also appreciate the ease of ensuring they maintain health code compliance.

A 40-gallon fresh water tank and a 40-gallon gray water tank will allow for substantial use. The CAH A16 SINK can also be connected to a simple garden hose for additional fresh water. If there is no water hook-up available, CALLAHEAD's fresh water delivery service or CALLAHEAD's WaterShed 25 or WaterShed 16 is also available to have a supply of fresh non-potable, non-drinkable water on-site for whenever you need additional water. The CAH A16 SINK is for cleaning and never for consumption. The CAH A16 SINK water can NOT be used for drinking, cooking or making coffee. The CAH A16 SINK is powered by a standard 110-Volt outlet or generator for convenience. The CAH A16 SINK is available for delivery throughout New York City's five boroughs of Brooklyn, Queens, Manhattan, the Bronx and Staten Island, as well as all of Westchester, Nassau and Suffolk Counties to Montauk Point. With every long-term sink rental CALLAHEAD provides weekly water delivery and gray water pump out service. Additional water delivery service can also be offered daily, weekly, monthly, or tailored to your requests.

ALWAYS WASH YOUR HANDS BEFORE AND AFTER:

Using the bathroom • Handling irritating substances such as acids, solvents, or cement • Before, during, and after preparing food • Eating food • Caring for someone who is sick • Before and after treating a cut or wound • Changing diapers or cleaning up a child who has used the bathroom • Blowing your nose, coughing, or sneezing • Touching an animal or animal waste • Touching garbage • Inserting or removing contact lenses • Touching a sick or injured person • Working with paint, solvents and chemicals • Any chemical or cleaning supplies

IMPORTANT FACTS:

The Center for Disease Control (CDC) affirms, "Keeping hands clean is one of the most important steps we can take to avoid getting sick and spreading germs to others." Infectious diseases commonly spread through hand-to-hand contact include COVID-19, flu, the common cold, flu, and other life threatening illnesses. Inadequate hand hygiene contributes to food-related illnesses, such as salmonella and E. coli infection. According to the U.S. Center for Disease Control and Prevention, as many as 76 million Americans contract a food-borne illness each year. • For proper hygiene it is recommended to have a minimum of one (1) Washing Station per 4 restrooms. "Handwashing" is a critical element in proper hygiene as germs can stay alive on hands for up to 3 hours.

The Occupational Safety and Health Act (OSHA) require employers to provide adequate washing facilities for employees that work with contaminants that may be harmful. The Association for Professionals in Infection Control and Epidemiology (APCI) position, "Although people usually think that germs are spread through the air, the fact is that germs are most easily spread through HAND CONTACT." AND "One of the best ways to avoid getting sick or spreading illness is to wash OR to decontaminate your hands." The Center for Construction Research and Training (CPWR) states, "Lack of cleaning facilities on construction job sites increases the likelihood of dermatitis, caustic burns from extended contact with wet cement, or acid burns from muriatic acid or other hazardous agents that come in contact with the skin, and infection." The result, additional workers' compensation claims.

HOW TO WASH YOUR HANDS:

The Center for Disease Control (CDC) affirms, "Keeping hands clean is one of the most important steps we can take to avoid getting sick and spreading germs to others." • Wet your hands with water. • Apply one dose of liquid soap and lather well for 15–20 seconds (or longer if the dirt is ingrained). • Rub hands together rapidly across all surfaces of your hands and wrists to help remove dirt and germs. • Don't forget the backs of your hands, your wrists, between your fingers and under your fingernails. • Wash your hands for at least 10 to 15 seconds. • Rinse well under running water and make sure all traces of soap are removed, as residues may cause irritation. • Pat your hands dry using paper towels. Make sure your hands are thoroughly dry. • Dry under any rings you wear, as they can be a source of future contamination if they remain moist. If possible, remove rings and watches before you wash your hands. • Each person should always use disposable paper towel or their own hand towel.

CAH A16 SINK OPTIONAL ACCESSORIES TO RENT:

For added convenience, we are proud to offer the below list of optional accessory items with your CAH A16 SINK. All of CALLAHEAD's rental accessories were selected to deliver the same comforts and hygienic protection of a home bathroom. CALLAHEAD's portable restroom accessory items are unparalleled in the portable toilet industry and include:
