

RollerSink®

Introduced to the Portable Sanitation Industry by **CALLAHEAD®**

CALLAHEAD offers the largest variety of portable hand washing sink systems in order to increase good hygiene and safety at job sites and special events of every size and location. The **ROLLERSINK**, our single user handwashing sink system on wheels is ideal when space is limited or easy mobility is required. The compact design allows the **ROLLERSINK** to be used almost anywhere handwashing facilities are desired or required. The **ROLLERSINK** has all the amenities of our larger sink systems including a soap dispenser, single fold paper towel dispenser and hand-free foot pump operation, yet is small enough for tight spaces or hard to access areas. With separate fresh and gray water tanks you're rest assured of hygienic protection and no gray water contamination. The **ROLLERSINK** is easily transported with its built in handle at the top and lightweight rubber tread wheels, maneuvering it is similar to a hand truck. Measuring only 18" wide and 62" in height the **ROLLERSINK** will fit easily in doorways, elevators, high-rise buildings, houses, cellars, garages, backyards, basements, on top of roofs, docks, through narrow alleys, gates and hallways and just about any other remote location requiring handwashing capabilities. **CALLAHEAD** realizes handwashing isn't just a simple matter of cleaning your hands of dust, dirt, and grime but it is one of the most important steps you can take in preventing the spread of infection, helping to keep yourself and those around you healthy. Our goal is to ensure every customer can make certain their job site or special event has the portable sink they require to protect themselves from bacteria and illness because we care. For guaranteed sanitation, superior quality, exceptional service and the largest variety, **CALLAHEAD** today for your portable sink needs.

PREVENT THE SPREAD OF ILLNESS THROUGH HANDWASHING:

The U.S. Center for Disease Control and Prevention has concluded, "handwashing" is the single most important means of preventing the spread of infection." It has been proven that handwashing is vital for everything from preventing the spread of germs that cause respiratory illnesses to preventing serious and even fatal bacterial infections. A number of serious diseases and infections could be prevented with proper handwashing including Influenza, E.coli, salmonella, meningitis, and certain gastrointestinal infections. You cannot see the pathogens that cause illnesses and the only way to fight them is to wash your hands properly and often. For proper hygiene it is recommended to have a minimum of one (1) handwashing station per 4 restrooms. Handwashing is a critical element in proper hygiene as germs can stay alive on hands for up to three hours!

ALWAYS WASH YOUR HANDS BEFORE AND AFTER:

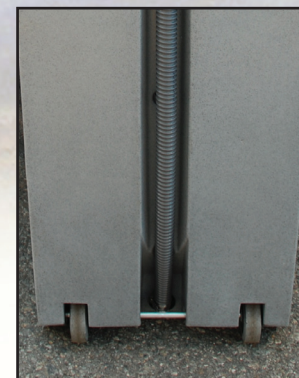

Using the bathroom. • Handling irritating substances such as acids, solvents, or cement. • Before, during, and after preparing food. • Eating food. • Caring for someone who is sick. • Before and after treating a cut or wound. • Changing diapers or cleaning up a child who has used the bathroom. • Blowing your nose, coughing, or sneezing. • Touching an animal or animal waste. • Touching garbage. • Inserting or removing contact lenses. • Touching a sick or injured person.
