

SPRING WATER SINK SYSTEM

CALLAHEAD's SPRING WATER SINK SYSTEM delivers a homelike sink without the need for any water hook-up or sewer connection. The SPRING WATER Sink System is completely self-contained and designed to run on bottled water. This portable sink system also provides hot and cold running water. The SPRING WATER Sink System is the perfect solution for long-term jobs or short-term special events.

Our SPRING WATER SINK SYSTEM is an efficient way for any location in need of fresh water and does not have a water supply available. Construction Jobsite office trailers, new building construction, commercial and residential water shut-offs, freeze-ups, and concession stands all benefit having the SPRING WATER SINK SYSTEM available for their handwashing and cleaning needs

The U.S. Center for Disease Control and Prevention has concluded, "Keeping hands clean is one of the most important ways to prevent the spread of infection and illness." Studies prove that proper regular handwashing can save lives, making it a necessity to have washing facilities available in every public setting.

This vanity style sink system looks and operates similar to a vanity inside your home. The SPRING WATER SINK SYSTEM has a water pump inside the vanity to conveniently fit any 5-gallon spring water bottle from your local grocery store or water delivery service. A hot water heater provides fresh hot water up to 125-degrees Fahrenheit. The marked hot water and cold water levers let you adjust the water to deliver the perfect temperature for every user's preference. The 15"X15" stainless steel sink supplies plenty of space for hand washing, cleaning dishes, utensils, or other similar items. There is even a deck on one side to place a soap dispenser, towel, or other items. The sinks trapped drain is connected to a 6-gallon grey water waste tank so you never have to worry about freshwater contamination or water run-off.

The SPRING WATER SINK SYSTEM is compact and attractive and can be used indoors or outdoors. Short-term locations such as catering, barbecues, banquets, food trucks, festivals, fairs, or other temporary locations can all use the SPRING WATER SINK SYSTEM. Long-term jobs, including construction sites, schools, bathroom or kitchen remodeling, and warehouses will need this sink system when they have no other water supply to ensure sanitary handwashing facilities are available

The SPRING WATER SINK SYSTEM is available for same-day delivery to New York City's five boroughs of Manhattan, Brooklyn, Queens, the Bronx, and Staten Island, Westchester County and all of Long Island's Nassau and Suffolk Counties to Montauk Point. A CALLAHEAD professional uniformed delivery specialist will place the SPRING WATER SINK SYSTEM at the location you select.

SANITARY FACTS:

Keeping hands clean is one of the most important ways to prevent the spread of infection and illness. Infectious diseases commonly spread through hand-to-hand contact include the common cold, flu, and other illnesses. • The U.S. Center for Disease Control and Prevention has concluded, "Handwashing is the single most important means of preventing the spread of infection." • The hands are the most likely part of the body to come into contact with harmful substances. Failure to take basic precautions can lead to skin complaints such as dermatitis and eczema. You must avoid hand contact with any hazardous substance. • Inadequate hand hygiene contributes to food-related illnesses, such as salmonella and E. Coli infection. According to the U.S. Center for Disease Control and Prevention, as many as 76 million Americans contract a food-borne illness each year. • For proper hygiene it is recommended to have a minimum of one (1) Washing Station per 4 restrooms. • "Handwashing" is a critical element in proper hygiene as germs can stay alive on hands for up to 3 hours.

HOW TO WASH YOUR HANDS:

The Center for Disease Control (CDC) affirms, "Keeping hands clean is one of the most important steps we can take to avoid getting sick and spreading germs to others." • Wet your hands with water. • Apply one dose of liquid soap and lather well for 15–20 seconds (or longer if the dirt is ingrained). • Rub hands together rapidly across all surfaces of your hands and wrists to help remove dirt and germs. • Don't forget the backs of your hands, your wrists, between your fingers and under your fingernails. • Wash your hands for at least 10 to 15 seconds. • Rinse well under running water and make sure all traces of soap are removed, as residues may cause irritation. • Pat your hands dry using paper towels. Make sure your hands are thoroughly dry. • Dry under any rings you wear, as they can be a source of future contamination if they remain moist. If possible, remove rings and watches before you wash your hands. • Each person should always use disposable paper towel or their own hand towel.
