

SAFETY LIGHT BY CALLAHEAD

CALLAHEAD believes you can never have too much safety at the job site. Our SAFETY LIGHT is standard with every CALLAHEAD SAFETY HEAD to provide an extra level of protection at the construction site. The SAFETY LIGHT will make every work area safer for workers and the public by enhancing visibility, making it essential for every construction location. The SAFETY LIGHT, together with the SAFETY HEAD, are designed and stand out, adding value to New York job sites. The SAFETY LIGHT is available in both red and yellow colors, which makes it impossible to miss.

Barricade lights are essential for visibility during evening hours and poor weather conditions. The SAFETY LIGHT is double-sided with super bright LED lights. Because the SAFETY LIGHT is solar-powered, it requires no electric or batteries to operate. The SAFETY LIGHT turns on automatically at dusk or poor weather conditions and turns off automatically at dawn. Having the SAFETY LIGHT at the job site will help ensure the safety of construction crews as well as pedestrians, bikers, and cars passing by the job site.

Adding additional security measures is especially necessary on road, highway, and street construction jobs. The flashing light of the SAFETY LIGHT will not go unnoticed by drivers passing crews working on the parkway. The SAFETY LIGHT will also benefit locations where there is little or no street lighting. Even when construction crews are not on the job, the SAFETY LIGHT will ensure cars passing over the bridge construction site see the flashing light of CALLAHEAD's SAFETY LIGHT. The SAFETY LIGHT will assist in alerting traffic of work zones from a further distance since it is high on top of the SAFETY HEAD Portable Toilet. Due to the height, vehicles on the highway will see the construction site ahead from more of a distance than with lights on top of average size barricades.

Barricade lighting is also always required at New York Airports. CALLAHEAD's SAFETY LIGHT is a must for a portable toilet to provide security and safety at the airport. The SAFETY HEAD portable toilet was designed to match perfectly with construction safety equipment such as safety cones, vests, signs, and hard hats. The SAFETY LIGHT, combined with the SAFETY HEAD, will have a positive impact on the public, employees, and clients. The SAFETY LIGHT looks incredible and shows that safety is a job site priority.

The SAFETY LIGHT will supply New York job sites with safety and cleanest portable toilet experience to eliminate accidents at the job site. Only CALLAHEAD is continually developing new and innovative ways to advance and protect our customers. Delivering sanitary protection with CALLAHEAD's highly acclaimed hospital grade cleaning service and offering the largest selection of portable restrooms to accommodate any long-term outdoor restroom need. The SAFETY LIGHT with CALLAHEAD's SAFETY HEAD guarantees to provide your job-site the highest value.

The SAFETY LIGHT can be attached to any CALLAHEAD portable toilet, but is highly recommended in high traffic locations with CALLAHEAD's SAFETY HEAD. CALLAHEAD services all of New York City's five boroughs of Manhattan, Brooklyn, Queens, Bronx, and Staten Island, Westchester County and all of Long Island's Nassau and Suffolk Counties to Montauk Point. CALLAHEAD has been in business since 1976, supplying New York construction sites with the best portable sanitation equipment and service in the industry. Don't risk using anything other than a CALLAHEAD New York for all of your portable sanitation needs.
