

SKY CRAPPER

BY CALLAHEAD

The SKYCRAPPER Restroom is a work-of-art and one of CALLAHEAD's newest of our never-ending inventions. Designed by Charles W. Howard an award-winning builder and designer and CALLAHEAD's President and CEO. Mr. Howard designed the SKYCRAPPER specifically for commercial locations with an existing sewer, cesspool, or holding tank. Unlike a portable toilet the SKYCRAPPER is a heavy-duty commercial porcelain flush toilet which looks and operates just like a public restroom.

The SKYCRAPPER is the perfect restroom solution for skyscrapers and high-rise buildings, ships, piers, barges, warehouses, parks, ConEd plants, industrial and sewer plants, or just about any commercial location with a domestic water hook-up or tank water available. CALLAHEAD'S SKYCRAPPER is commonly rented to follow work crews in high-rise buildings and skyscrapers to different floors with minimal effort. The SKYCRAPPER Restroom has a slim design and on wheels to easily move through elevators, hallways, gates, and alleys. The dicast wheels lock securely in place for safety. A lifting hoist can also attach the SKYCRAPPER Restroom to a crane or other similar equipment to transport up, down, across or around to a barge, ship or wherever needed.

The entire restroom is constructed of commercial marine-grade plastic, stainless steel and aluminum to withstand the toughest jobsite and weather conditions.

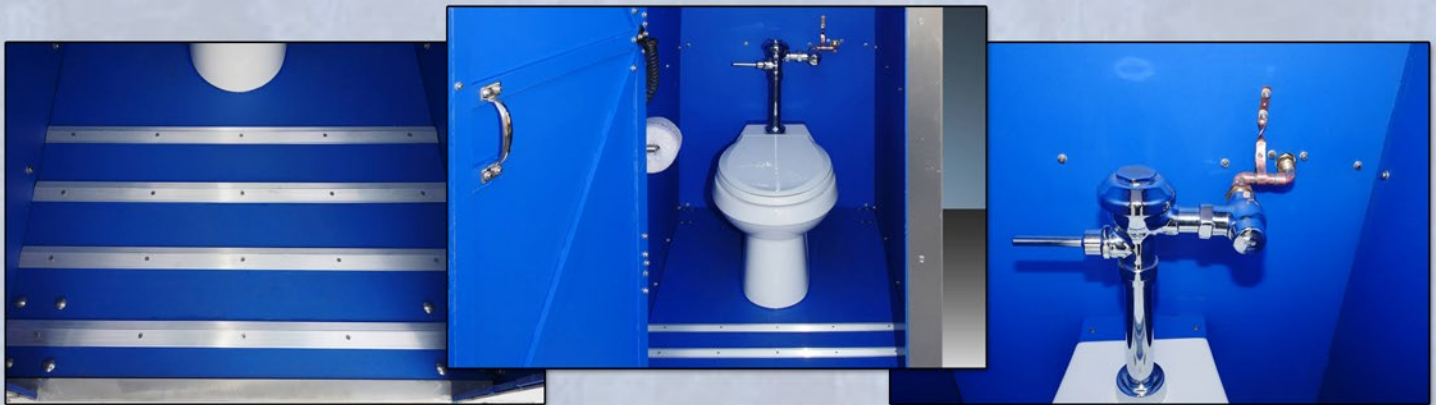

CALLAHEAD's SKYCRAPPER Restroom is the only one of its kind designed, manufactured, and available exclusively through CALLAHEAD for same day or next day delivery. Offered in ten beautiful color choices of Blue, Green, Orange, Brown, Yellow, Black, Indigo, Arctic White, Dolphin Gray, and Red to match with the jobsite's location. The SKYCRAPPER is a private restroom for any commercial location with a water and sewer hookup available on-site. The SKYCRAPPER Restroom is constructed from commercial grade marine plastic, stainless steel and aluminum. Therefore, there will be no rust or corrosion and create an anti-growth environment for mold and algae.

The aluminum clad exterior framing looks spectacular. The exterior clad framing of the SKYCRAPPER naturally breaks the winds force preventing the unit from tip overs. A fully covered marine-grade plastic roof has a generous pitch to prevent rainwater leaks.

The SKYCRAPPER'S spring-loaded door will stay closed at all times. The door has an interior and exterior door pull and an interior lock for privacy. A padlock is available through CALLAHEAD to keep the unit secure from public use. The door is shortened 4-inches from the top and 4-inches from the bottom to create an incredibly well-ventilated environment. The exterior door has stainless pressed CALLAHEAD signage representing the very best in restrooms.

Inside the SKYCRAPPER is a commercial porcelain toilet with a commercial flushometer that provides 1.25-to-1.6-gallon flush water volume. The filled toilet paper holder is easily accessible. Hand sanitizer can be added and wall mounted upon request. The smooth interior walls have no framing to allow for easy mobility inside. The floors have aluminum grip plates to prevent slipping and sliding. An LED 6.2W 500K LED bulkhead light installed inside will provide plenty of light and require a standard 110-Volt outdoor extension cord that can be plugged into the side of the unit.

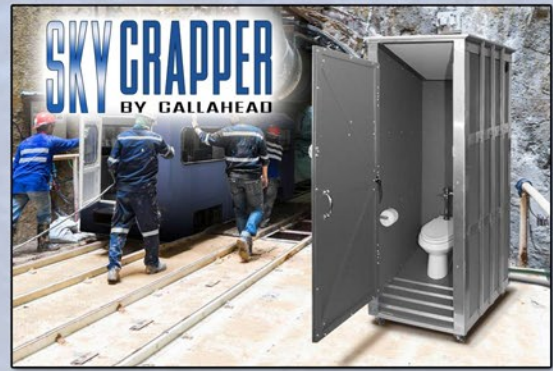

The SKYCRAPPER was designed for locations with existing sewers, cesspools, holding tanks, and water on-site. With a rear exit toilet bowl system, a black steel PVC or hose can be hooked up for discharge. In the rear exterior of the unit there is a 3-inch discharge for easy waste connection hook-up to connect to a sewer, cesspool or holding tank. A heavy-duty garden hose can be connected to the SKYCRAPPER'S external 3/4" hose bib connection to supply fresh water to toilet bowl. The wheels are 3-inch lockable with a 360-degree pivot in the front and 3-inch fixed in the rear. The wheels are semi-recessed to prevent damage. Once the SKYCRAPPER RESTROOM is rolled to its destination the wheels can be locked to keep the unit in place for safety.

The SKYCRAPPER RESTROOM can be transported to the needed location with a crane, boom truck, bulldozer, forklift or other similar equipment. The SKYCRAPPER'S exterior aluminum clad framing makes for easy lifting with chains, straps or cables. Whether you need a restroom on the top floor of a building or across the water on a ship, the SKYCRAPPER RESTROOM with its design and easy mobility is the solution. CALLAHEAD'S SKYCRAPPER provides a cost-effective way for crews working on multiple floors to have a private porcelain flush toilet on any floor. This eliminates unnecessary wasted work time which results in loss of revenue for an employer. With the SKYCRAPPER'S ability to be attached to a crane, it can be lifted to any floor convenient for your employees to use. Being only 31" wide the SKYCRAPPER RESTROOM can be glided through doorways, elevators, alleys and hallways with ease.

The SKYCRAPPER is available for same day or next day delivery throughout New York City's five boroughs of Manhattan, Brooklyn, Queens, Staten Island and the Bronx as well as all of Westchester, Nassau and Suffolk Counties on Long Island all the way to Montauk Point.

The SKYCRAPPER is the very first of its kind, a private portable restroom with a commercial flush porcelain toilet designed by Charles W. Howard and manufactured by CALLAHEAD, for commercial locations. A SKYCRAPPER on the jobsite will deliver comfort and sanitation specifically designed for high-rise building construction or commercial locations with water, sewer, cesspool or holding tank on-site. Construction crews will especially appreciate access to a private restroom with a porcelain toilet that operates like a public restroom on the job.

CALLAHEAD has been in business since 1976 and with 5 decades of experience in the portable sanitation industry we have accommodated every portable restroom request possible. We are experts in the field giving our customers peace of mind with any specialty job or request. CALLAHEAD is a New York company serving only the New York area with equipment that never varies by location. When you want the best innovative equipment and service in the industry, only CALLAHEAD is the company that delivers.

The SKYCRAPPER'S DESIGN SPECIFICATIONS & FEATURES:

- **Construction:** commercial marine grade plastic with stainless steel fasteners and aluminum welded framework.
- **Color Options Available:** Blue, Green, Orange, Brown, Yellow, Black, Indigo, Arctic White, Dolphin Gray, and Red
- **Height:** 83"
- **Width:** 31"

SKYCRAPPER OPTIONAL ACCESSORIES TO RENT:

For added convenience, we are proud to offer the below list of optional accessory items with your SKYCRAPPER Restroom rental.

- Antiseptic Dispenser can be installed inside your SKYCRAPPER filled with our waterless hand sanitizer. Our waterless hand sanitizer kills 99.9% of germs and bacteria and meets OSHA and Health Department requirements. The antiseptic dispenser is perfect for sanitary protection for yourself and others. The antiseptic dispenser supplies approximately 900 - 1300 uses and refilled when needed by CALLAHEAD with its rental
- GoJo Hand Cleaning Dispenser can be installed inside the SKYCRAPPER RESTROOM and filled with the #1 heavy duty GoJo hand cleaner. GoJo hand cleaner is popular among auto mechanics for its ability to easily break down grease and grime. GoJo Hand Cleaner has become popular with construction workers and contractors to remove acids, cement and other solvents from hands.
